

16 November 2016

To whom it may concern:**ELI COETZEE CONSULTING ENGINEERS (Pty) Ltd. PROFESSIONAL SERVICES**

We herewith confirm that Eli Coetzee Consulting Engineers have assisted us with a number of investigations into the safety and stability of the structures in and around our plant, and also on a small emergency safe-making project of critical items in need of urgent repair.

Further to the above, we have in November 2015 appointed Eli Coetzee Consulting Engineers to provide us with multi discipline professional services for a major upgrade project of our plant and site which has a footprint of 30 347m².

The scope of work that they are involved with, inter alia include:

- The demolition and reconstruction of existing concrete floor slabs in and around the main factory building.
- The extension of the current plant building and provision of new ablution facilities.
- The construction of a new flammable warehouse.
- The rehabilitation of our roads and storm water systems.
- The construction of new site entrances, a small new office inside the plant, a large deck at our main office building social area, and upgrading of our main office building conference facilities.
- The provision of a facelift to all our plant buildings.

Eli Coetzee Consulting Engineers' responsibilities includes:

- The performing of survey work, investigative work and studies from which the required scope of work could be determined.
- The appointment (as sub-consultants) and management of professionals required for the planning, design and management of the project. Also acting as principal agent to the client throughout the construction phase of the project.
- The completion of a concept design and costing.
- The completion of a detail design and costing inclusive of detailed drawings and specifications to be used for construction purposes, as well as contract documentation to be used for the appointment of contractors for the execution phase of the project.
- Providing assistance with the invitation of suitable contractors to tender on the execution phase, and the completion of evaluations on such tenders received.

- Compiling contract documentation for signature, and management of the contractors throughout the construction period.

To date, Eli Coetzee Consulting Engineers have successfully completed the following work on the project:

- All work up to-, and inclusive of the appointment of a contractor for the demolition and rebuilding of the concrete floor slabs of the main plant building.
- Virtually all work up to-, and inclusive of the detail design and compiling of drawings and specifications of all other required construction work.

The above contract commenced in November 2015, and is expected to be completed by end 2017.

The overall cost of the construction work is currently estimated at roughly R19 000 000.00.

With the help of Eli Coetzee Consulting Engineers, to date, the project is being completed swiftly, with no notable unplanned time and cost extensions. In general, we are very satisfied with the level of service provided, and the manner in which the work is being done.

Yours sincerely,

Sudeshen Thevan
