12 December 2020

To whom it may concern

Eli Coetzee Consulting Engineers has been a project partner of ProjectWay since 2014.

In our current engagement, they are the Lead Consultant and Structural Engineer in the Owner's Engineer team for a programme of projects to upgrade and expand infrastructure at the Mercedes Benz Plant in East London, South Africa. These multibillion-rand upgrades will increase the production capacity of the plant and is focussed on the production of new vehicle models.

The project commenced in January 2017 and is set to complete in April 2021.

As with previous collaborations, we found the service from Eli Coetzee Consulting Engineers to be professional and diligent, providing optimal engineering solutions in limited timeframes and under challenging multidisciplinary conditions.

As a company we are proud to have Eli Coetzee Consulting Engineers in our team and this reference is provided with confidence.

Yours faithfully

Reniel Engelbrecht
Director
